NON-EXTREME COLD WEATHER – CLOSING PROCEDURE

Weather Related · https://roundupsaloon.com/docs/non-extreme-weather-procedure/

These measures are to be deployed at close when the overnight low is predicted to be below freezing but ***above*** 25F degrees:

EXTERIOR / PATIO BAR

- Turn on / Leave on BOTH heaters over the Patio Bar.

EXTERIOR / PATIO AREA

- Turn on / Leave on heater over the flap at Station 1/2.

EXTERIOR / GENERAL

- If winter precipitation is expected, sprinkle ice melt pellets around both the Back Customer Door and the Back Manager Door. These ice pellets should be *sprinkled* not dumped in mounds please!

GENERAL / MISCELLANEOUS

- Leave the bar ***presentable*** and ready to open in case Maria (our cleaning lady) can't get into work the next day:
  - Pick up large trash from floors
    - napkins
    - pens
    - trick cards
    - fruit
    - etc

- Make sure drink rails, dancer boxes, and bar tops are clear of the same kind of trash.
- Flush toilets.
- ***Absolutely no vomit/poop/pee should be left not-cleaned-up****!*
